PROFESSIONAL SUMMARY

Full-Stack Web Developer and Engineering student with strong hands-on experience building modern, high-performance web applications using the JavaScript/TypeScript ecosystem (React, Next.js, Express, PostgreSQL, Prisma). Proven track record in cross-functional team collaboration, backend queue processing, and complex state management across community programs and enterprise-level academic projects.

EDUCATION

Bachelor of Engineering

April, 2024 - April, 2028

Technological University (Meiktila)

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, SQL, HTML5, CSS3
- **Frontend Development:** React, Next.js (App Router), Vite, Tailwind CSS, Shadcn UI, Zustand
- **Backend & Database:** Node.js, Express.js, PostgreSQL, Prisma ORM, Redis, REST API
- **Tools & Software:** Git, GitHub, Postman, Docker

FEATURED PROJECTS & EXPERIENCE

Event Ticketing System (Community project)

Frontend Developer

Tech-stack: React, C#, REST API

- Collaborated in an agile cross-functional team with UI/UX designers and C# backend developers as part of the “**One Project One Month**” community initiative led by senior industry engineers.
- Developed interactive frontend user workflows in React, converting Figma designs into responsive components.
- Integrated asynchronous **REST APIs** to consume complex backend data models and manage real-time event booking states.

Student Attendance Management System

Fullstack Developer

Tech-stack: Next.js, TypeScript, PostgreSQL, Prisma ORM, Tailwind CSS, Shadcn UI

- Engineered a full-stack academic administration system in a 5-member collaborative team to streamline attendance tracking across departments.
- Implemented **role-based access control (RBAC)** separating administrative workflows for Heads of Departments, teachers, and students.
- Designed relational PostgreSQL database schemas with Prisma ORM to efficiently handle class records and reporting.

Furniture Shop E-commerce Web App

Fullstack Developer

Tech-stack: React, Express.js, PostgreSQL, Prisma ORM, Redis

- Architected an e-commerce backend utilizing Express.js and Prisma ORM to manage inventory, catalog data, and transaction flows.
- Integrated **Redis-backed background job queues** to process asynchronous tasks efficiently without blocking main API execution.
- Built a responsive React client interface with seamless state management for shopping carts and order processing.
