PROFESSIONAL SUMMARY

Full-Stack Web Developer and Engineering student experienced in building web applications with TypeScript, React, Next.js, Node.js, and PostgreSQL. Experienced in developing responsive interfaces, integrating REST APIs, designing relational databases, and implementing backend features such as asynchronous job processing. Interested in understanding systems end-to-end and solving technical problems across both frontend and backend.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology

Technological University (Meiktila) — Meiktila, Myanmar

Expected April 2028

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, SQL
 - **Frontend:** React, Next.js (App Router), Vite, Tailwind CSS, shadcn/ui, Zustand, HTML5, CSS3
 - **Backend:** Node.js, Express.js, REST APIs
 - **Database:** PostgreSQL, Prisma ORM, Redis
 - **Tools & Software:** Git, GitHub, Postman
-

PROJECTS

Student Attendance Management System

UI/UX & Full-Stack Developer | Academic Team Project

Next.js · TypeScript · PostgreSQL · Prisma ORM · Tailwind CSS · shadcn/ui

- Designed and developed a full-stack attendance management system as part of a 5-member team, contributing across both UI/UX design and application development.
- Designed relational PostgreSQL database schemas with Prisma ORM and developed backend functionality for managing students, teachers, classes, subjects, and attendance records.
- Built most of the application's frontend, developing reusable React components and layouts for dashboards, teachers, students, and classes to maintain a consistent interface across the system.
- Implemented attendance tracking and reporting features, including data processing and CSV/Excel export for attendance records.

Furniture Shop — Full-Stack E-Commerce Web Application

Full-Stack Developer

React.js · TypeScript · PostgreSQL · Prisma · Redis · REST API

- Built a full-stack furniture e-commerce application with React.js, TypeScript, PostgreSQL, and Prisma, implementing both frontend and backend functionality.
- Designed and implemented RESTful APIs for authentication, products, posts, profiles, and user interactions with protected routes and role-based access control.
- Implemented Redis caching and background job processing to improve API performance and handle asynchronous tasks such as image processing and cache management.
